

5 April 1963

MEMORANDUM FOR THE RECORD:

SUBJECT: DCI Morning Meeting

25X1 1. [] reported that Secretary Talbot is going to [] at the end of this month to try to work out [] policies relative to the Persian Gulf area. 25X1 25X1

2. Apparently the Lunik shot is going to pass close to the moon and not impact. It is not clear at this time whether it will orbit around the moon or be a miss. Mr. McCone indicated that there was high level concern about the U.S. manned lunar program and requested Mr. Kent to look at the estimate in light of the most recent shot. He also requested GMAIC (later changed to OSI) to present information on what could be accomplished by instrumentation on the moon and what could be accomplished by having an actual man there.

25X1 4. DCI indicated that he would be seeing Mr. McCloy next Tuesday. McCloy has been asked to review our disarmament policies and, particularly, the status of our test ban negotiations. DCI indicated that he had given his personal views to the President that our present position went too far in terms of safeguards and that he felt an agreement would not be particularly useful relative to the nth country problem since the Soviets have no control over China and we have no control over DeGaulle. The President was inclined to agree but felt that we should continue to negotiate, although he wasn't very sanguine about any success.

5. There is considerable concern about the subversive threat to Thailand. Apparently different reporters give different versions of the seriousness of the situation. DD/I has already prepared a briefing paper for the Director on the subject, but they were asked to look at it again in the light of any possible new information.

6. DCI reported on Special Group and deferment of Laos flight consideration until next week (see HS Memo for the Record). DCI directed that we prepare a flight plan for Laos and review with Harriman prior to the meeting. Action: OSA

8. I reported on the successful CORONA catch; the OXCART program, and on the NRO funding program. The DCI indicated that McNamara had a directive from the President to prepare a contingency plan in the event that U-2s could no longer operate over Cuba. I stated that NRO had been given action on this and we were preparing a report.

9. The DCI also briefed the President on the OXCART program. The President is very much interested in the supersonic transport, which was discussed with Kelly by the DCI on his visit. Kelly had indicated the cost of \$50 million per aircraft on an order of 100. The President was not startled by this number, even though it is considerably higher than other estimates. He pointed out that there are many other costs than just the aircraft costs in a SST program.

HERBERT SCOVILLE, Jr.
Deputy Director
